RAMP PROFILES

The nicest thing in life is freedom. Eliminate interfering barriers!

Even the smallest differences in height often lead everyday to significant limitations. Especially in public areas or commercial areas this accessibility is disruptive and should be avoided. But this is often not possible for old buildings and conversions.

With the profiles of the alferlevel series, you can compensate for differences in levels of up to 20mm – even outdoors. Whether pallet truck, wheelchair or inline skates, the profiles are robust and can make annoying obstacles just disappear.

RAMP PROFILES

Application ramp profile

alferlevel – The ramp profiles provide a smooth transition to adjoining lower coverings. They are ideal for the connection to lower materials.
