STEP EDGE PROFILES

Form meets function: style element and safety factor at once.

Stairs are a defining design element in architecture. The steps provide creative transitions and structure to the space. alferstep combines visual requirements with functional needs. Step edge profiles increase tread safety and protect the edge at the same time against mechanical stress.

STEP EDGE PROFILES

Application Florentine profile

alferstep – Besides a shapely closure of the step edges, the step edge profiles provide extra tread safety and protection against mechanical stress.
