TILE ANGLE PROFILE
MADE OF PLASTIC

alferpro®

Application angle profile

alferbasic – Angle profiles are classical closures for tile coverings. Decorative and functional: the perfect protection for tile edges.

THE FINISHING TOUCHES FOR TILES, PARQUET, LAMINATE, DESIGN FLOORS OR CARPET.

Whether as a closure or transition between coverings, the profiles of the alferbasic series protect the tile edges and create an elegant look. A variety of options, materials and finishes offers the right product for you for every application. Whether functionally elegant or cosily rustic, the profiles fit into any environment. They can be cleverly placed even according to the designer's touch.

TECHNICAL SPECIFICATIONS

Polyvinyl chloride, hard
Short name PVC-U

All information is approximate. Since we can not assume liability for special applications, a corresponding suitability test must always be carried out by the customer.

PLASTIC

PROCESSING

Choose the tile angle profile according to the tile thickness. Apply the tile adhesive to the edge of the surface to be tiled with a notched trowel. Press in and align the tile angle profile in the damp tile adhesive. Cover the attachment leg completely with glue. Press in and align the tile so that it matches the top of the profile.

DELIVERY FORM

The profiles are available in heights:
6; 8; 10; 11; 12,5mm
depending on the surface (see catalog).

The profiles are available in lengths:
250; 300cm
depending on the surface (see catalog).

SURFACES

Matt

PACKING UNIT

PU 1 = 10 pcs, PU 2 = 50 pcs, PU 3 = 150 pcs

PROCESSING, CARE, CLEANING

The following points must be observed in order to prevent damage on the profiles surfaces:

- The processing instructions of the tile adhesive must always be observed.
- Any excess of grout, mortar and tile adhesive on the profile surface should be removed immediately with water.
- Allow to dry out thoroughly, ensuring the area is well ventilated.
- The protective film or similar, used for the installation, can only be removed after the paving has dried completely.
- The profiles are cleaned with a damp cloth and pH-neutral agents.

MATERIAL PROPERTIES

Plastic angle profiles are suitable for normal mechanical loads in indoor and outdoor areas and are partially resistant to chemicals. They are not UV resistant and fade over time. Avoid exposure to intense sunlight during storage.

STORAGE AND TRANSPORT

The profiles should be protected against external impact and abrasion.

DISPOSAL

The profiles can be supplied to plastic recycling.
