STEP EDGE PROFILE
AND ACCESSORIES MADE OF ALUMINIUM

alferpro®

Application Florentine profile

alferstep – Besides a shapely closure of the step edges, the step edge profiles provide extra tread safety and protection against mechanical stress.

FORM MEETS FUNCTION: STYLE ELEMENT AND SAFETY FACTOR AT ONCE.

Stairs are a defining design element in architecture. The steps provide creative transitions and structure to the space. alferstep combines visual requirements with functional needs. Step edge profiles increase tread safety and protect the edge at the same time against mechanical stresses.

TECHNICAL SPECIFICATIONS

AlMgSi0,5
Material number: 33.206

All information is approximate. Since we can not assume liability for special applications, a corresponding suitability test must always be carried out by the customer.

PROCESSING

Choose the florentine profile according to the tile thickness. Apply the tile adhesive to the edge of the surface to be tiled with a notched trowel. Press in and align the florentine profile in the damp tile adhesive. Cover the attachment leg completely with glue. Press in and align the tile so that it matches the top of the profile.
