BUILT-IN NICHE

Good design is a niche.

The alferbox built-in niches offer you new opportunities to set design highlights. Different colours and sizes allow for a variety of designs – not only in the bathroom, but everywhere in the house. Whether you create an absolute eye-catcher with the niches or let them blend in with the surrounding tiles: Everything is possible according to your taste. If you wish, you can even tile the boxes – with the surrounding tiles or perhaps a mosaic? There are no limits to what you can do here.

If you have a choice, you are spoilt for choice: whether black, stone greige or satin-finished V2A – alferbox always offers the right solution.

The alferbox is now also available with integrated LED lighting. The LED recessed niches are supplied as a set and are even plug&play capable. So simply connect the plugs and your alferbox is atmospherically illuminated.

A matching sealing collar is available as an option.

BUILT-IN NICHEs

The alferbox from alferpro is a small storage miracle: it makes more out of less. Instead of shelves, soap dishes or other storage units mounted in the shower cubicle or on the wall, alferbox makes use of the space in the wall. The built-in element turns niches into attractive storage areas by opening up previously unused spaces in bathrooms or sanitary areas, but also in kitchens or other areas of the home. This is a clever way to create more space.

Whether in the shower, above the sink or the bathtub, whether as a clever variant in the kitchen or as a stylish solution in the living room - the alferbox wall elements can be used to quickly and effortlessly create elegant and unobtrusive and discreet storage areas.

The special feature: The boxes are available as completely prefabricated wall elements made of high-quality stainless steel, so they can be installed directly in the wall without any time-consuming assembly work.

*The LED built-in niches are supplied as a set. The scope of delivery includes a transformer 15 W and a LED standard silicone stripe 4000 K (neutral white) including connection cable 250 cm. The Stripes are dimmable and Plug&Play capable.

SMART-HOME CAPABILITY

One of the best things about alferlight is its smart-home capability.

And it's as simple as this: You need the **Meshle App**, which can be downloaded free of charge from Google® Play (Android™) or the Apple App Store (iOS). Once the App has been installed, a wide variety of light colors and brightnesses can be set.

Length: 250 cm
Material | Colors: Aluminum black powder coated matt,
Aluminum stone greige powder coated

Do you already know the alferpro app? With it, you have access to the entire alferpro range, as well as various application examples and material information, anytime and anywhere.

In the alferpro area, we have created a configurator especially for planning and implementing terraces. On the basis of just a few entries, such as the dimensions of the terrace and the slabs intended for it, you will receive, in addition to a parts list, instructions for assembly and the matching accessories. Furthermore, you can use the data sheets stored in the app to read everything important about the properties and technical data of our products.

You don't have the alferpro app on your smartphone yet? Then it's time now!
