

# alferbasic

## ANGLE PROFILES

### **The finishing touches for tiles, parquet, laminate, design floors or carpet.**

Whether as a closure or transition between coverings, the profiles of the alferbasic series protect the tile edges and create an elegant look. A variety of options, materials and finishes offers the right product for you and every application. Whether functionally elegant or cosily rustic, the profiles fit into any environment. They can be cleverly placed even according to the designer's touch.

Even for applications with special loads you will be delighted with alferbasic. Therefore, anodized aluminium profiles impress particularly in damp areas. The quality of brass and stainless steel is especially evident when under mechanical stress. The powder coatings, available in many shades of colour, are also hard-wearing.

The alferbasic series offer angle profiles in heights from 2mm to 30mm.

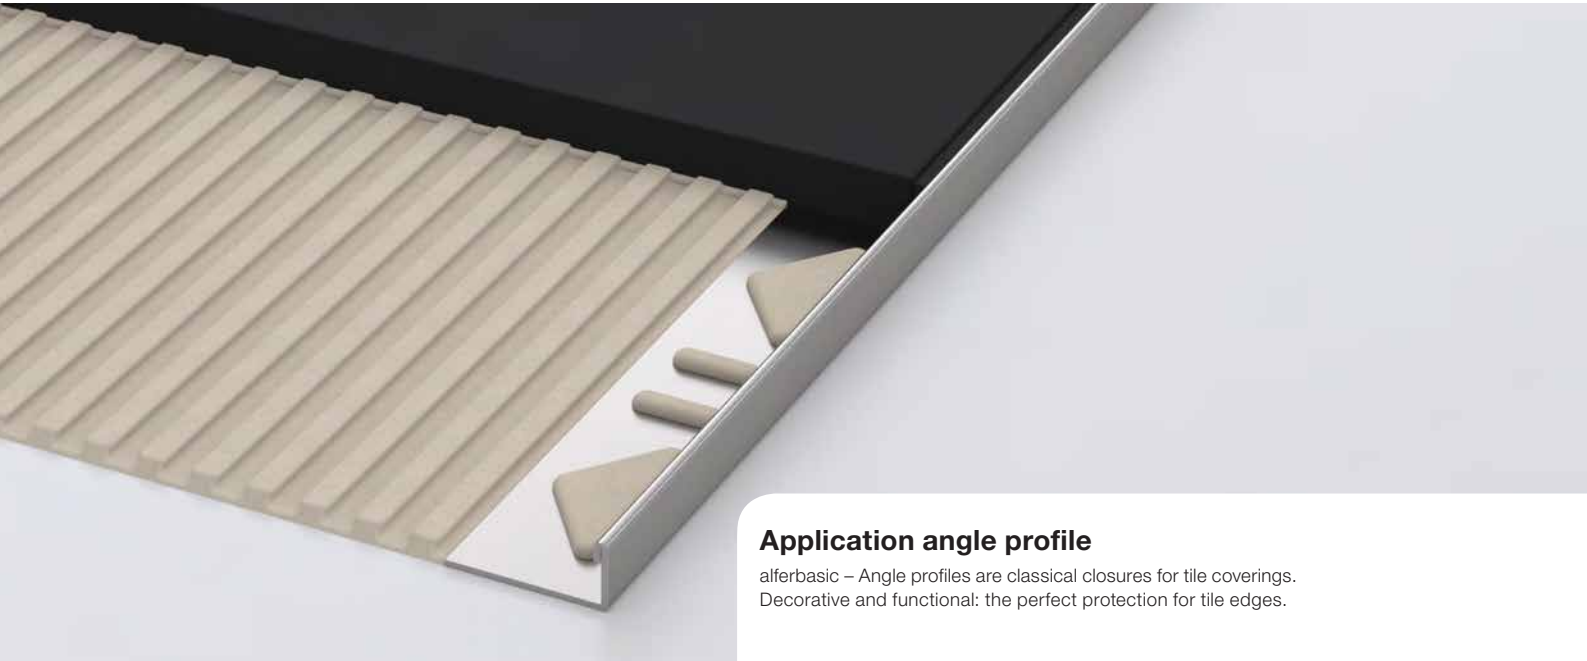

# alferbasic

## ANGLE PROFILES

### Application angle profile

alferbasic – Angle profiles are classical closures for tile coverings.  
Decorative and functional: the perfect protection for tile edges.
