CORNER SHELVES

Style in every corner

Are you ready for a good dose of style in your bathroom? Forget the hassle of planning wall installations and immerse yourself in the world of **alferstyle** corner shelves. Your shower utensils always to hand and a real eye-catcher at the same time!

Our stainless steel corner shelves are not only practical for shampoo and soap, but also make a statement in terms of design. Choose from three beautifully designed versions: Triangle, pentagon or arc, and discover a variety of design options that will make your bathroom shine in new splendour.

Simple installation is our promise - whether during tiling or subsequently integrated into the joints, our corner shelves are always a breeze. And best of all: They harmonise perfectly with our **alferbox** built-in niches and **alferline** shower channels to transform your oasis of well-being into a unified work of art.

AVAILABLE IN A WIDE
RANGE OF DESIGNS

CORNER SHELVES

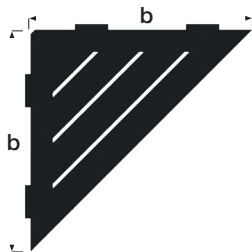

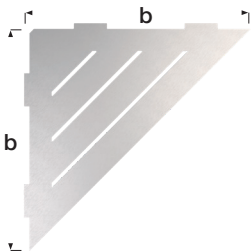

alferstyle – corner shelf

Every modern shower cubicle needs an alferstyle corner shelf. These not only provide a practical place to store shower gel and shampoo, but also make your bathroom really shine.

CORNER SHELF CIRCULAR ARC DESIGN BUBBLE

Material | Colors: Stainless steel V2A brushed,
Stainless steel V2A black powder-coated matt

Width b: 200mm

INSTALLATION INSTRUCTIONS

1. The uncoated corner shelf is coated with a light film of oil at the factory for production reasons. The shelf must therefore be cleaned with a soft cloth and a little acetone before installation.

2. Corner shelf - installation during tiling

After the tiles have been laid and the tile adhesive has hardened, the corner shelf must be positioned and its position marked on the tiling. We recommend removing the corner support to protect it from soiling after labelling and before applying the covering grout. before grouting. The marked area must be left out when grouting.

Corner support - installation in an existing or jointless tile covering

Mark the position of the lateral material lugs of the corner support on the tiling. Remove any existing grouting in the marked area. For jointless coverings: cut open the covering in the area of the marking. Caution: Any existing sealing layer behind the covering must not be damaged

- 3.** Insert the corner support with its lateral material lugs into the ungrouted area, align it and apply a silicone joint on all sides. In the case of installation during tiling, silicone may only be applied after the covering joints have dried.
- 4.** The curing time of the silicone must be observed before using the corner support.

SUITABLE SERIES FOR YOUR CORNER SHELF

alferbox

BUILT-IN NICHEs

Good design is a niche.

The built-in niches, simply elegant or with integrated LED lighting, offer new possibilities for setting design highlights. Different colours and sizes allow for a variety of designs - not only in the bathroom, but everywhere in the house. Whether you create an absolute eye-catcher with the niches or let them blend in with the surrounding tiles: Everything is possible according to your taste. If you wish, you can even tile the boxes - with the surrounding tiles or perhaps a mosaic? There are no limits to what you can do.

SHOWER CHANNELS AND PROFILES

Shower channels made of stainless steel for the highest demands in design and reliability.

alferline slim flex is the shower channel that can be customised. The channel is made of high-quality stainless steel, does not rust and can be cut to length using standard tools so that it fits exactly into the shower. This means no more tile waste or unsightly mitre cuts. Apart from the shower channel, alferline has a lot more to offer:

From shower wall panels and gradient wedges to glass profiles, you will find everything you need to install your dream shower.
