

alfercircle

QUARTER CIRCLE PROFILES

Rounded outer edges – safe and elegant.

The symmetrical cross section of the alfercircle gives coverings a smooth transition or closure. Less prominent than the other series, alfercircle fades into the background, granting the lead role to the covering. The finish is completed with matching inside corners.

The discreetly rounded outside corners not only look great, they also reduce the risk of scratches in case of impact. alfercircle – a round design in stainless steel, aluminium or plastic.

alfercircle

QUARTER CIRCLE PROFILES

Application quarter circle profile

alfercircle – The closed quarter circle profile is suitable as a wall inside corner: robust protection for the tile edge and design element in one.
